To Whom It May Concern:

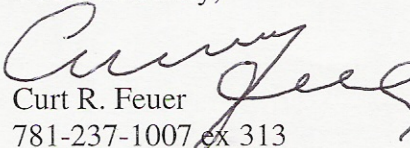

This letter confirms that Osiana II employed Kaj and Lucie Christensen on board the 116' motor yacht from July 2003 to May 2004 as Captain and Chief Stewardess.

During this period, myself as the owner as well as various charterers cruised continually in New England and the Caribbean. In addition, the yacht undertook significant refits and upgrading work including renewal of all main machinery, redo of stabilizers, electrical distribution systems and other general refit works.

Both Kaj and Lucie were fully involved in the planning and execution of all the yacht's cruising, refit activities and general business. They showed excellent organizational skills, as well as the ability to liaise and work successfully with myself, guests, charterers and management company personnel. Kaj's seamanship and management skills are top level and Lucie's charm and savoir faire make them a great team.

Please feel free to call me if I can be of any further assistance.

Yours sincerely,

Curt R. Feuer
